Please amend the claims as follows:

Technology Center 2600

- 1 11. (Twice Amended) A system comprising:  
2 a processor;  
3 a storage coupled to said processor;  
4 a video controller coupled to said processor; and  
5 a packetization device coupled to said video controller to independently packetize  
6 at least two heterogeneous video streams for transmission thereof in respective native  
7 information formats and associated native frame rates.

**COPY OF PAPERS  
ORIGINALLY FILED**

**REMARKS**

Claim 11 stands rejected under §102(e) over the *Yang* reference. Applicants have amended claim 11 to include a packetization device that may "independently packetize at least two heterogeneous video streams for transmission thereof in respective native information formats and associated native frame rates." Support for this amendment may be found in many places in the Applicants' Specification, including page 7, lines 25-26 and page 8, lines 1-19. Use of native formats and rates for the purposes of transmission or transport of heterogeneous video streams that
